
Transfer Courses

Revised 06.04018

The Woodbury Graphic Design program is designed as a sequential curriculum involving courses whose content builds on the learning from subsequent courses. It is recommended that transfer students enter in the fall semester to take advantage of the optimum curricular sequence, however, students are accepted for the spring semester. It is not necessary, or even preferable, for students to complete an AA Degree before entering the program. It is also recommended that transfer students complete the following design and general education courses before matriculation in the Graphic Design program in order to progress through the curriculum in a timely fashion.

For more information, as to specific course transfer click on the link below:
